Other Considerations

1. For the existing EOC exams, standard setting and other test development activities may need to be revisited as the current voluntary EOC exams are transitioned to a high-stakes, mandatory assessment.
2. Current EOC exams are being delivered online, however district technology infra-structure would most likely preclude having mandatory, high-stakes exams delivered in an online only administration. Therefore print versions of the exams will need to be provided.
3. EOC assessment requirements for Special Education students will need to be determined to ensure that exams meet Federal regulations.
4. EOC assessment requirements for English Language Learners (ELL) will need to be determined to ensure that exams meet Federal regulations.
